

Keeping in touch with loved ones at Meyer House Care Home

During these restricted times, we've really made the use of technology for our residents at Meyer House Care Home to keep in contact with their families and friends.

In particular it's been so special to see our residents light up when they see loved ones on the screen during a Skype call.

Our lovely resident Kath loved video chatting with all her family – you can see her delighted face and Betty spent time on the phone catching up with her Husband Terry.

These calls really mean the world to our ladies and gents.
