

## Meyer House Care Home celebrates World Octopus Day

**We marked World Octopus Day at Meyer House Care Home on Friday 8 October - any excuse for a celebration!**

World Octopus Day celebrates one of the earth's oldest creatures. The animal is best known for its eight legs and ink-squirting abilities. There are an incredible 300 species of octopuses and these clever sea creatures boast some 500 million neurons in their brains and arms!

We made our own **edible octopuses**; some healthy ones from strawberries and some sweeter ones using marshmallows and red sugar laces, *yum!*

Our ladies and gents also enjoyed some **octopus themed colouring** and **word searches**, followed by a **fascinating documentary** about the creatures.

***A relaxing and informative afternoon!***
