

Meyer House Care Home residents enter virtual reality

Our Meyer House Care Home residents were able to travel anywhere in the world when we had our first virtual reality session last week!

*Our ladies and gents could select a place of their choice; the destinations varied from **New York, Australia, Kenya on safari, shopping in London** and even a trip to **Disneyland**.*

We were all totally amazed by how real the experiences were and are already planning where to go on our next adventure. *The world is our oyster!*
